2024 Development Goal #1 – FB Velocity (FF)

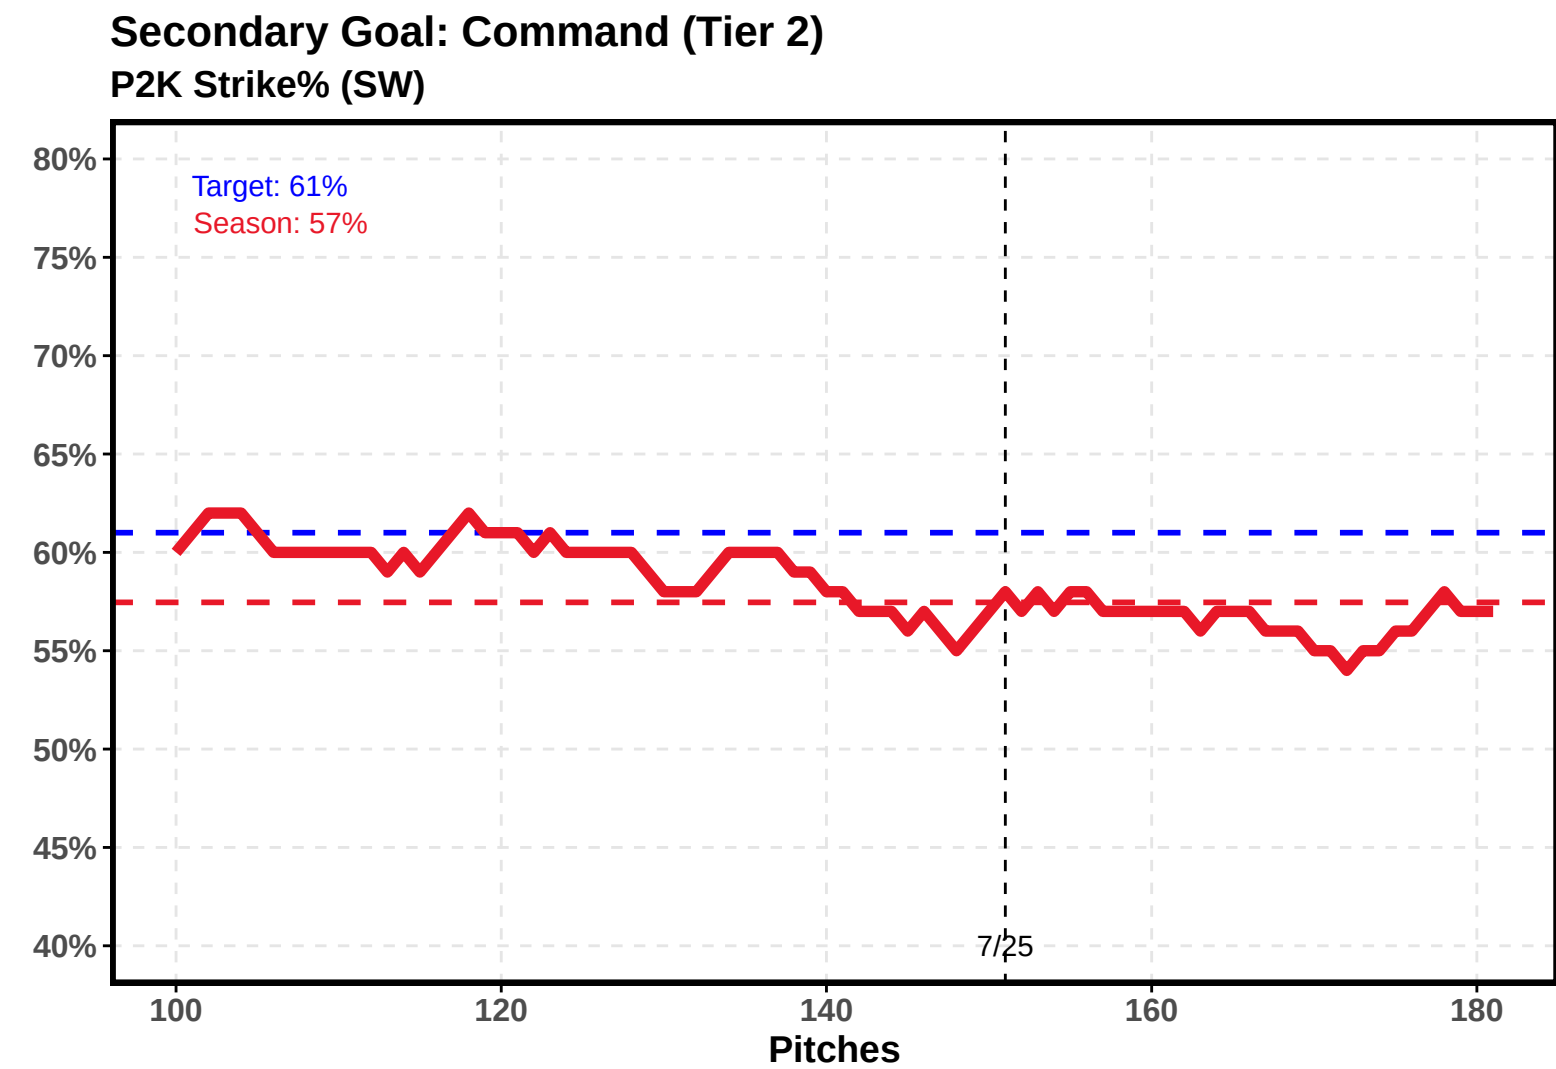

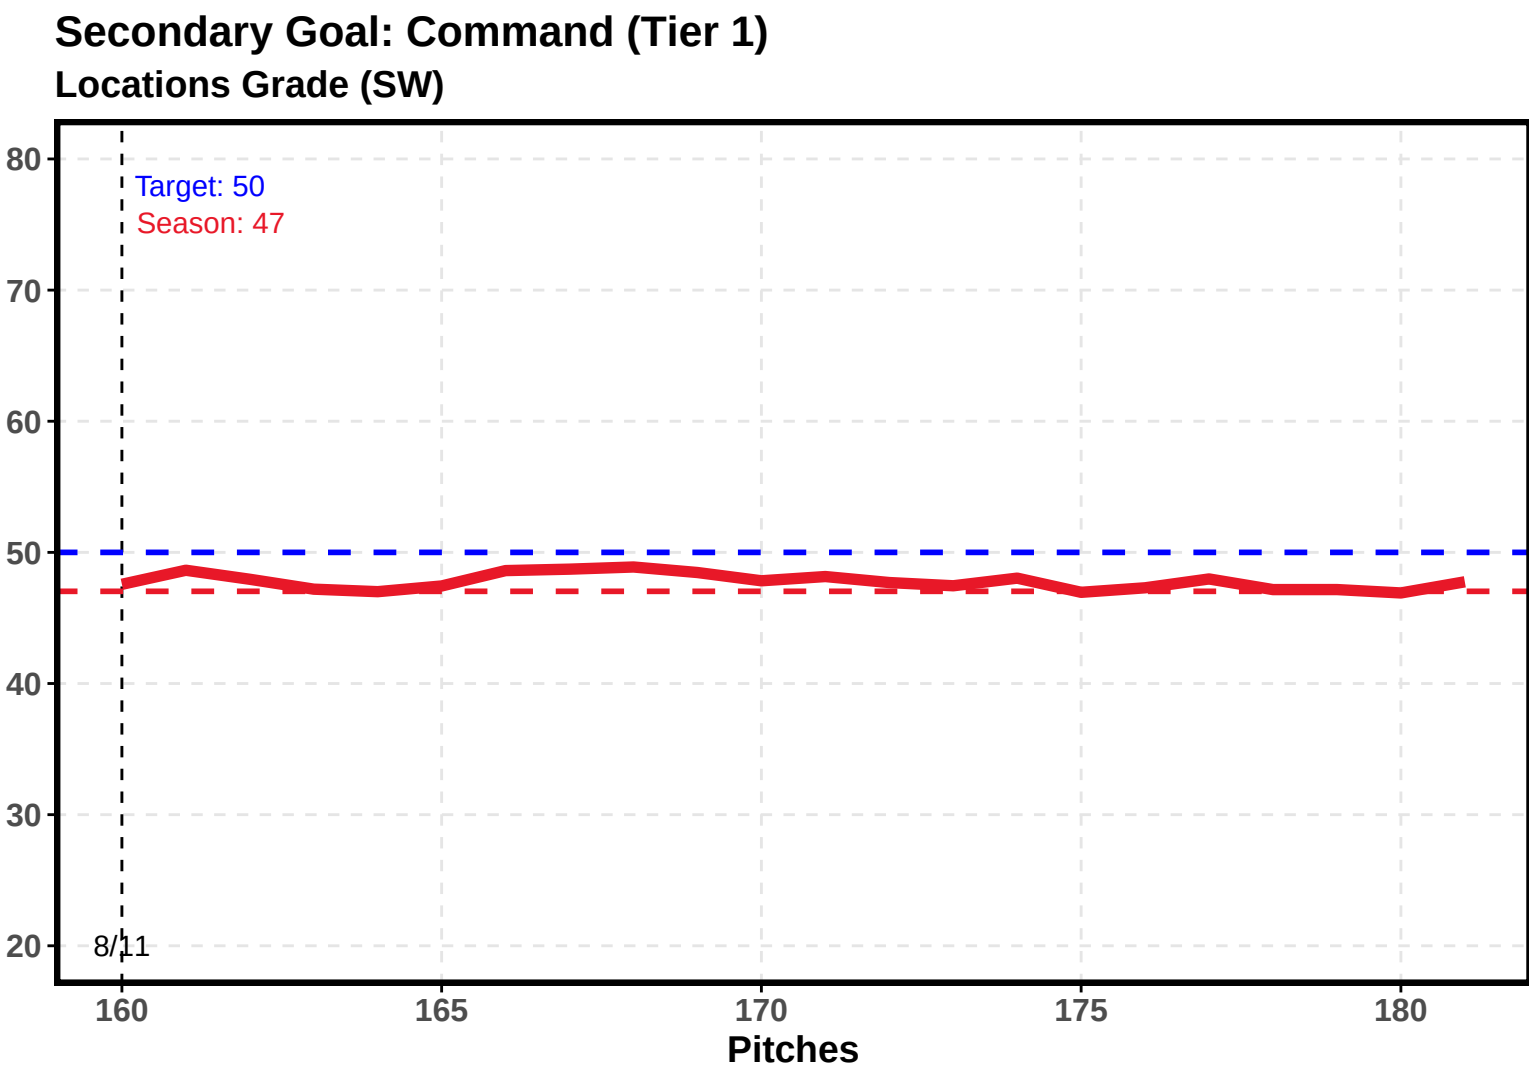

Development Analysis: Aug. 23, 2024

Thompson fell a few ticks short of the lofty goal of a 94 MPH fastball average and it...s fallen a little bit as the season has gone on. Every extra MPH would be a huge return on investment given the shapes of all of Paxton...s pitches and his strike throwing ability.

2024 Development Goal #2 – Locations Grade (SW)

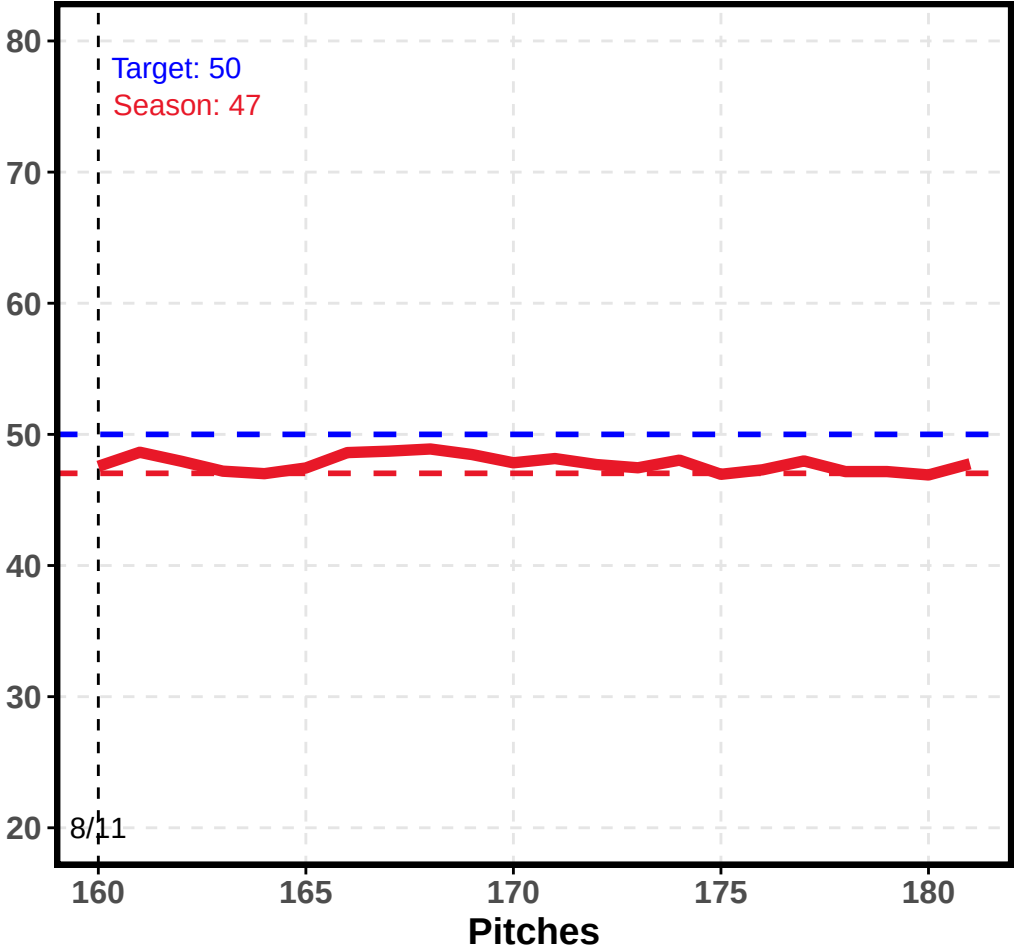

Development Analysis: Aug. 23, 2024

Paxton...s SW Locations goal is 50 and he...s currently at 47 on the season, though he...s 5 percentage points shy of his secondary goal (61% P2K strikes). His strike-throwing really fell off in July ... 60% strike, 42% zone, 14% waste in first three months, 48% strike, 29% zone, 26% waste since.

Development Goals – 2025

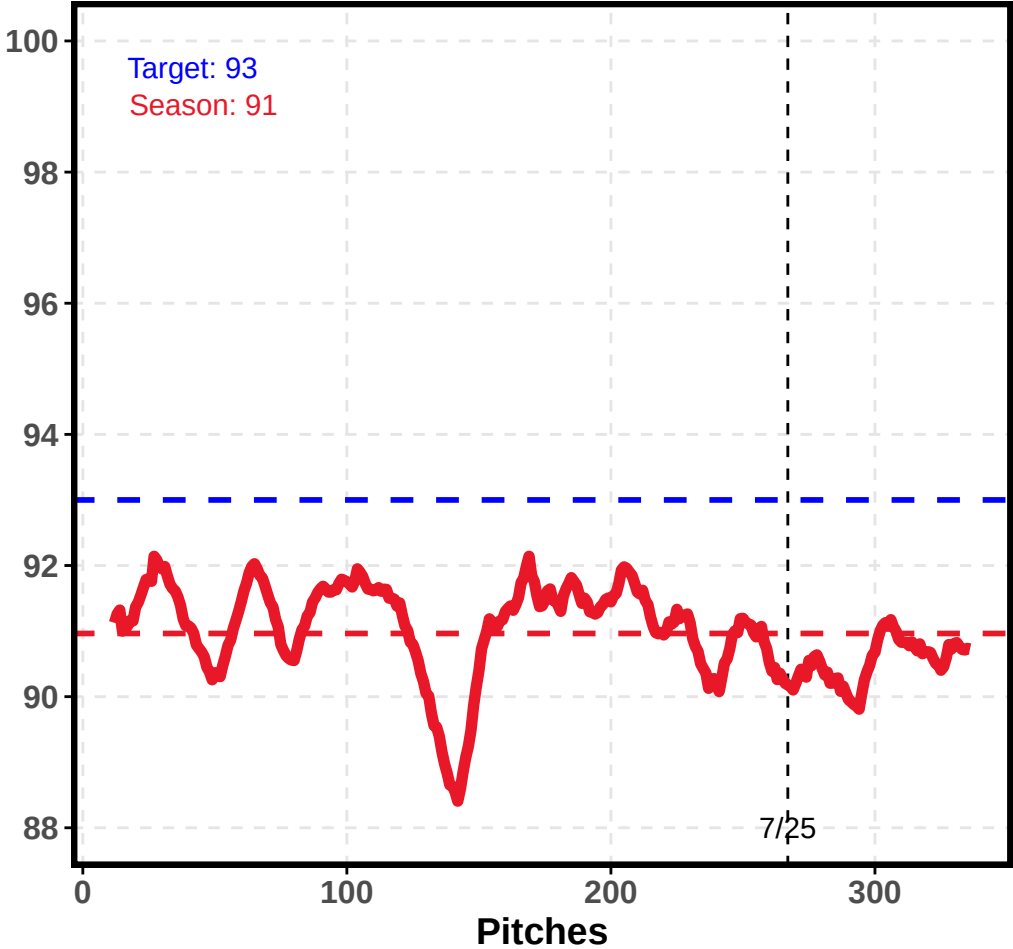

Secondary Goal: Command (Tier 1)
Locations Grade (SW)

Description: Aug. 25, 2024

We are looking to repeat this goal after falling short of completing it in 2024.

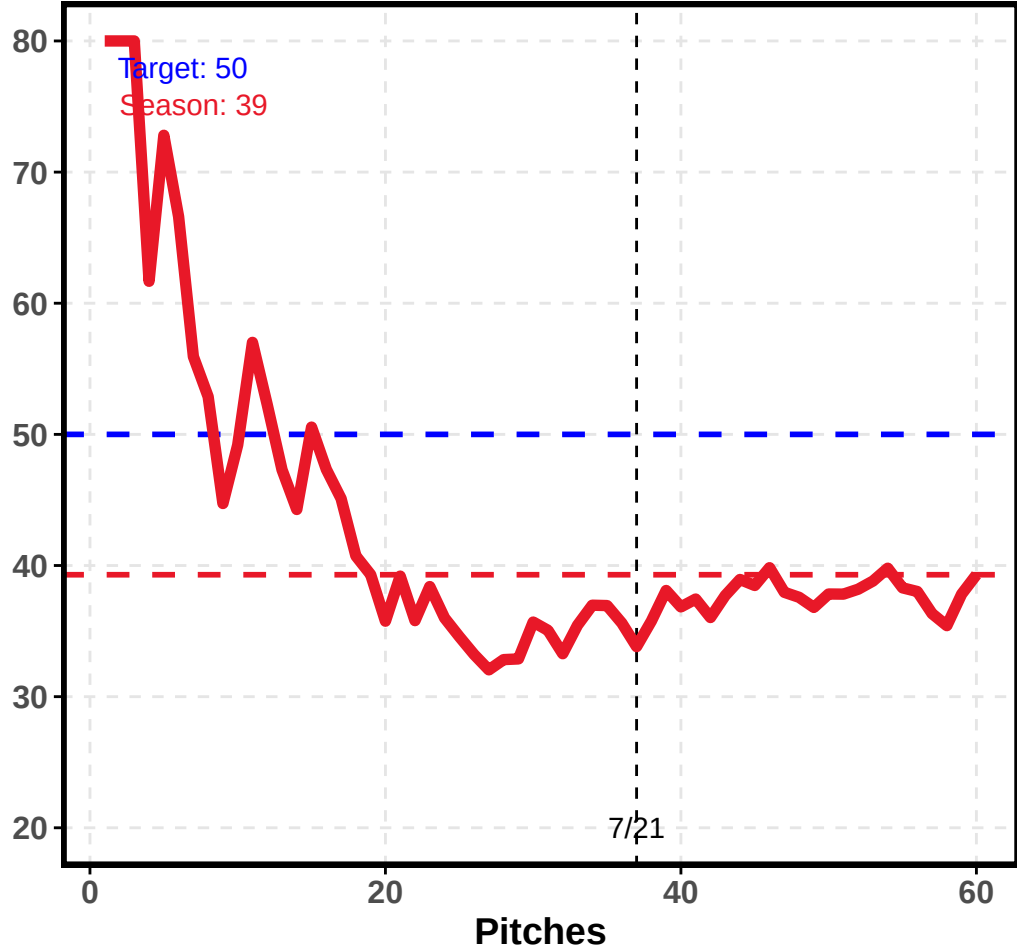

Primary Goal: Engine (Tier 1)
FB Velocity

Description: Aug. 25, 2024

In ...23 in college, Thompson 91.3 MPH on his fastball and in his first full season of pro ball averaged 91.0 MPH. Our goal in 2024 if for Thompson to average 93 MPH.

Secondary Goal: Command (Tier 1)
Locations Grade (CH / P2K)

Description: Aug. 25, 2024

In 2024, in P2K counts, Thompson...s CH had a 40 Loc grade with a 53% Strike% and was in zone 30% of the time. While this sort of CH/SP pitch will never be in zone as much as a pitch like Thompson...s FB, improving the strike throwing ability with this pitch will be important in ...25. Most of the misses are concentrated arm-side – getting them down on the plate should help.
