Performance Metric

Notes

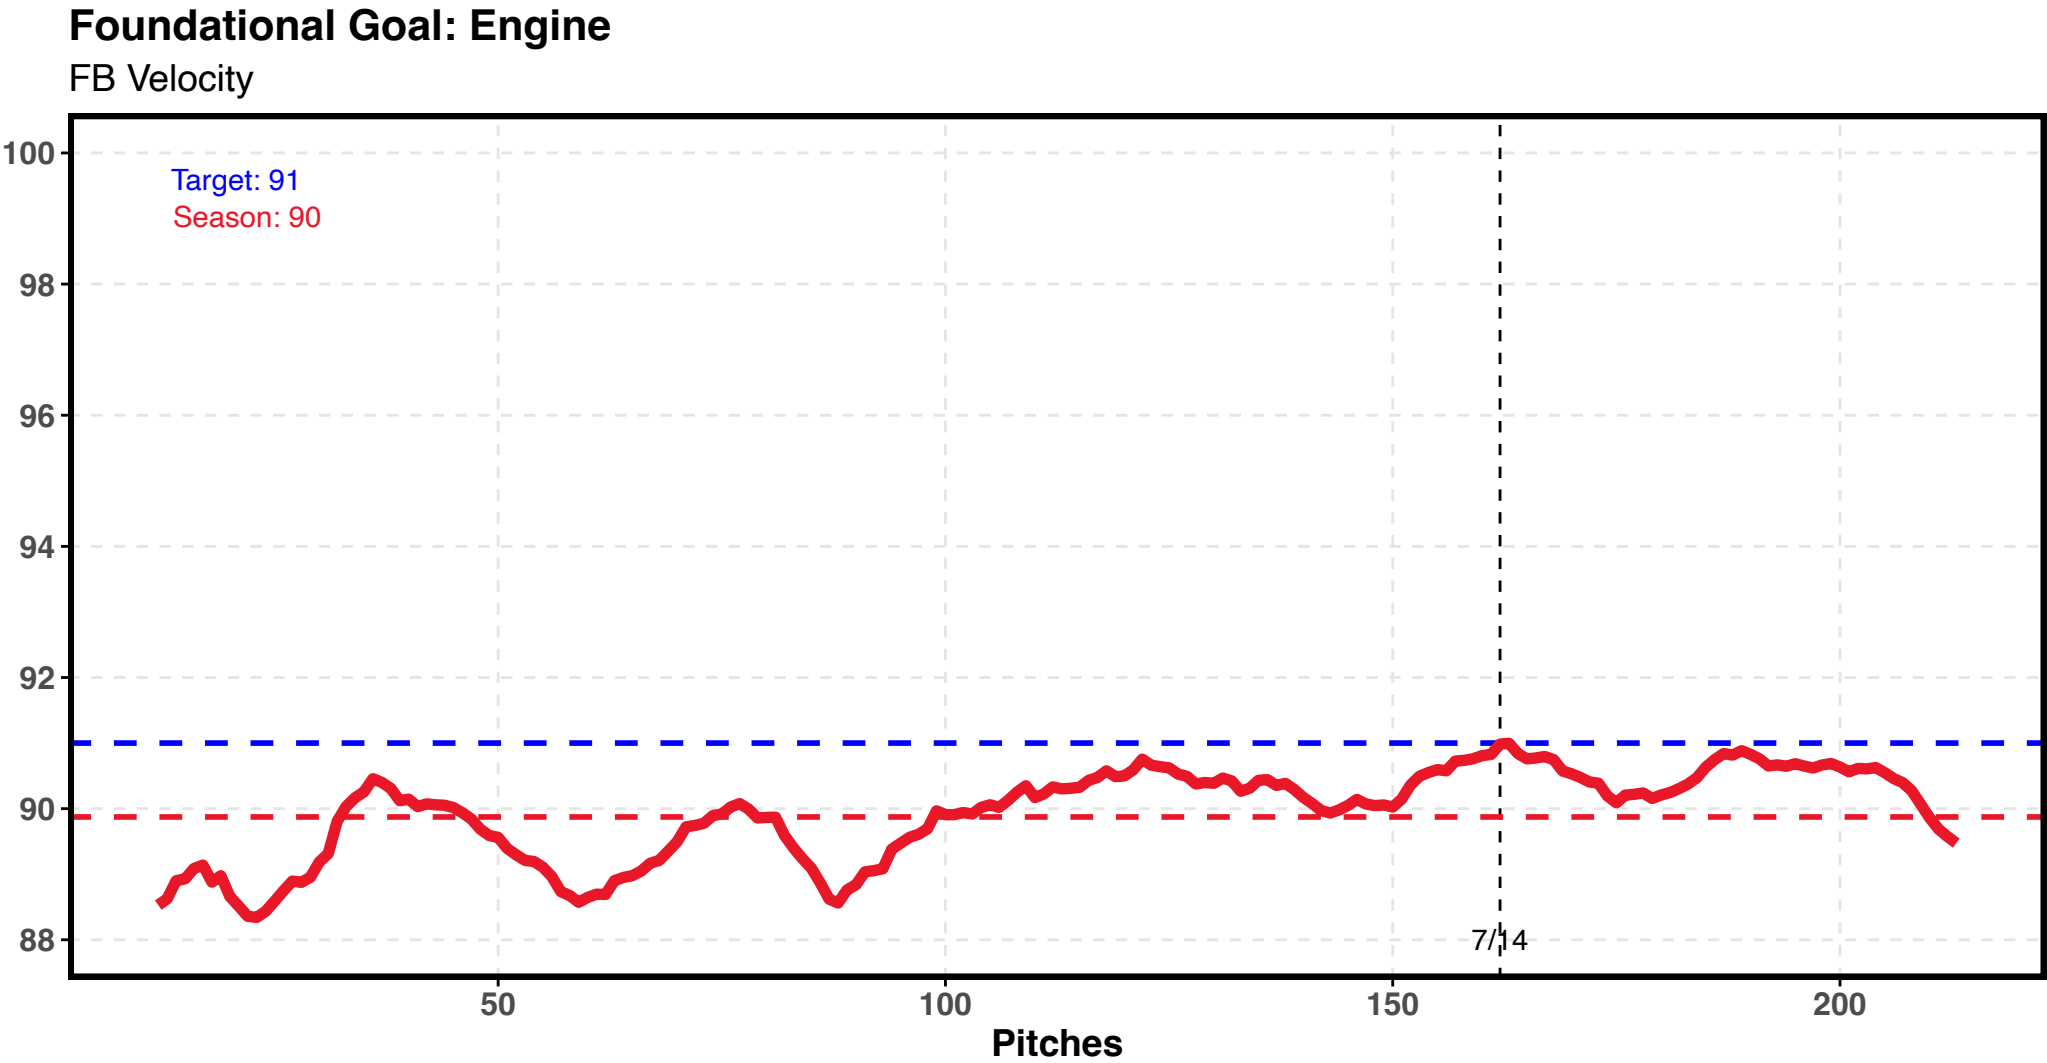

Command Grade
(CT)

Since adding your CT last season, you have done an incredible job mastering feel of the pitch. It quickly has become your best Command pitch in your arsenal. You have a Major League quality Command grade with the pitch and well above MLB average Locations grade (58) of the pitch. With that, it has been your most effective run value pitch in 2025.

2025 Development Goal #1 – FB Velocity

Development Analysis: Sep. 26, 2025

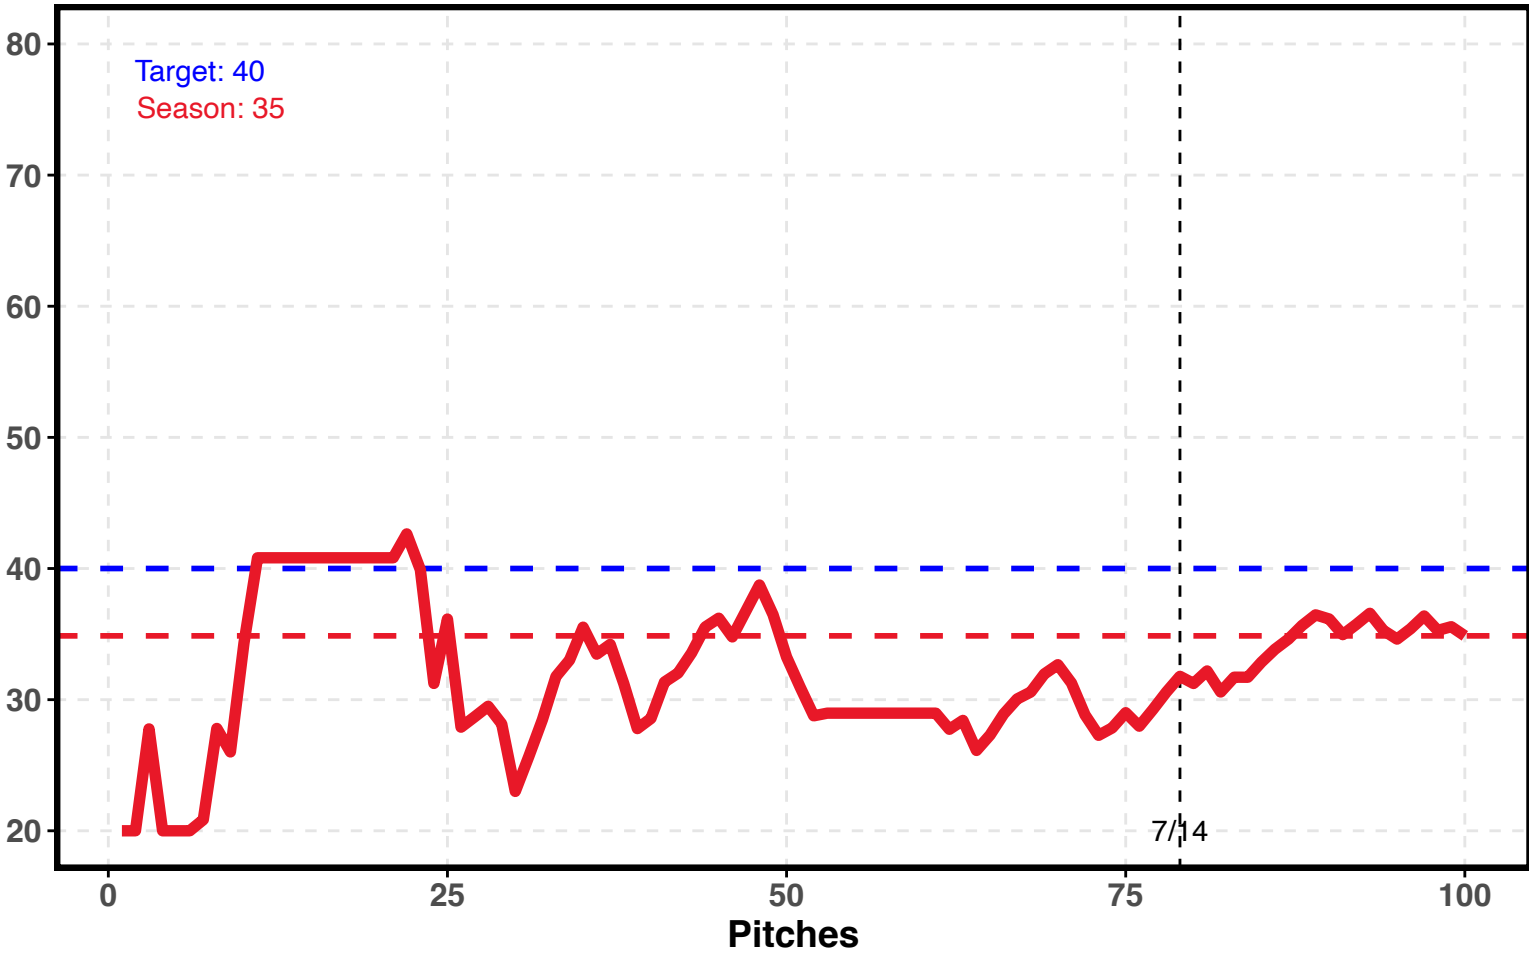

In the second half of the season, we set a fastball velocity goal of 91 MPH for you. In April and May, you averaged 89.3 MPH and from June onwards, you averaged 90.4 MPH. Great work there on regaining that full tick! Unfortunately, that is still down 0.5 MPH from your average last season.

2025 Development Goal #2 – Command Grade (SW / P2K)

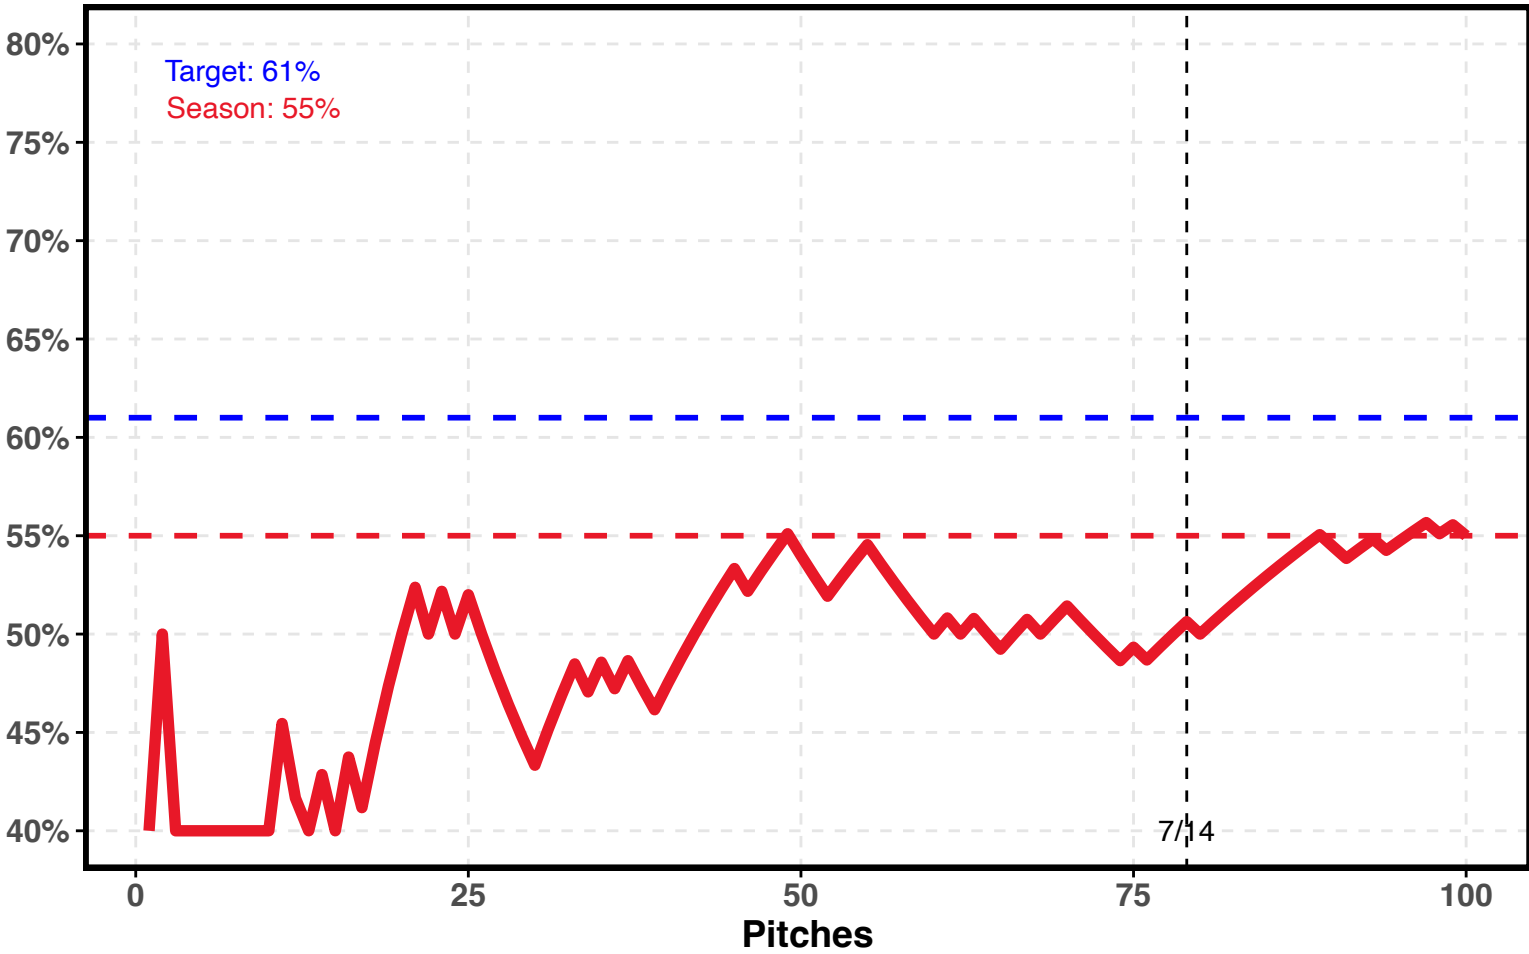

Foundational Goal: Command

Command Grade (SW / P2K)

Performance Goal: Command

P2K Strike% (SW)

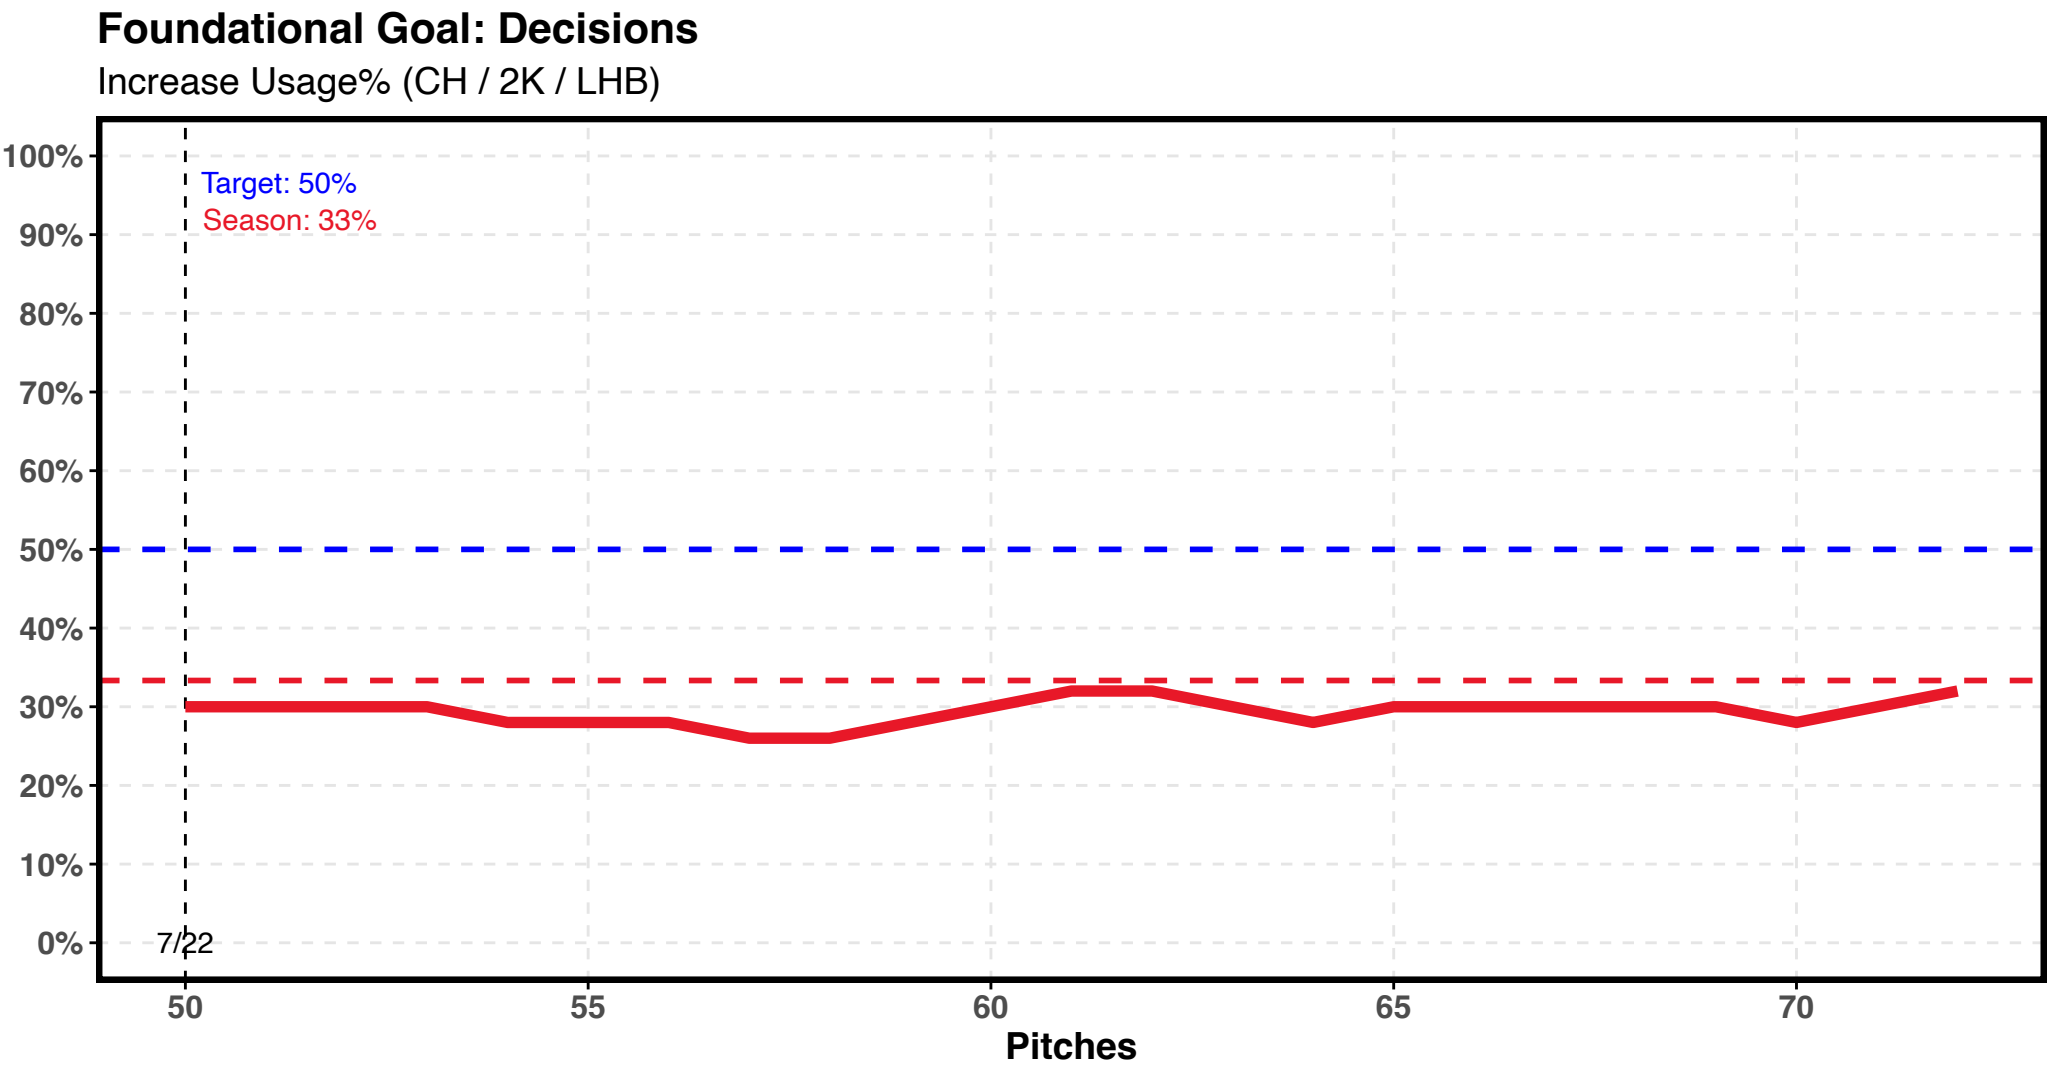

Development Analysis: Sep. 26, 2025

This sweeper Command grade goal was set for you in the 2nd half of the season because the pitch is your highest graded Stuff offering and 2nd most used pitch behind your fastball, but it was also your worst Command grade pitch. Since setting this goal, you did not have the highest sample size to base trends off of, but with that, we saw some improvements in the 2nd half! From April through June, you threw 101 sweepers and had a Command grade of 30 with a miss distance of 14.2 inches. From July through the end of the season, you threw 47 sweepers that had a Command grade of 38 and a miss distance of 13.0 inches. This lead to your strike rate going from 51% in through June to 62% from July onward. Keep this up!

2025 Development Goal #3 – Increase Usage% (CH / 2K / LHB)

Development Analysis: Sep. 26, 2025

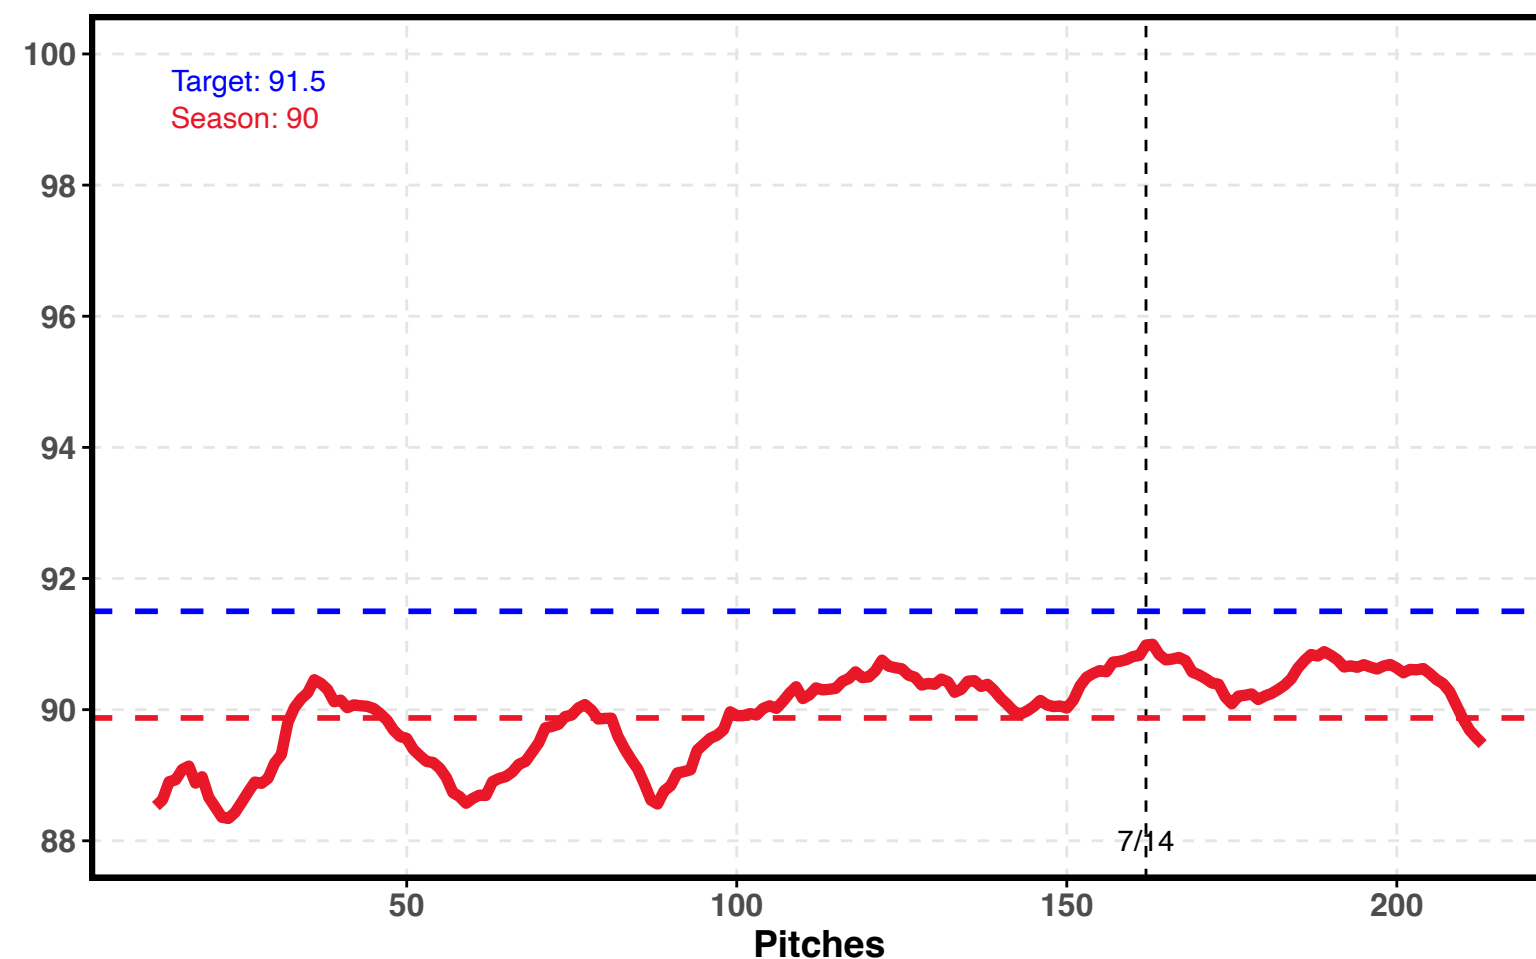

This changeup usage goal in 2K counts vs. LHB was set for you because in each of the last two seasons, your CH has been your best swing and miss pitch vs LHB (21% SwStr) with a SwStr% more than twice as high as any other offering. Usage hovered around 30% in 2K counts vs. LHB all season. This CH usage late is probably still an opportunity to drive up your 19% K% vs. LHB that you have had in the last two seasons.

Development Goals – 2026

Foundational Goal: Engine

FB Velocity

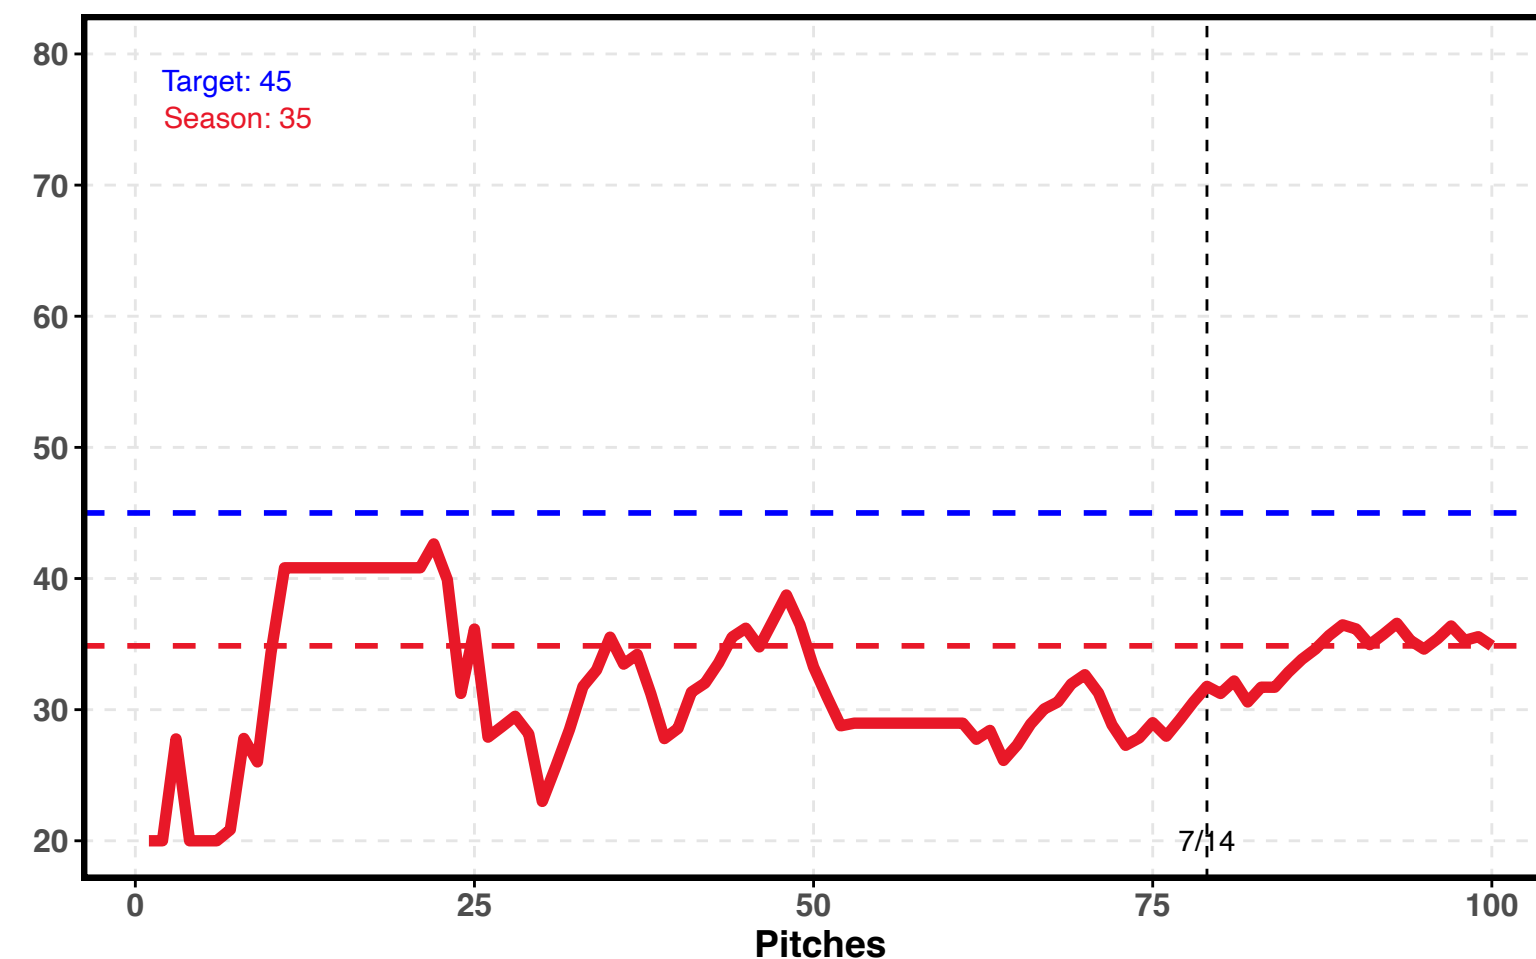

Description: Sep. 26, 2025

Being able to add velocity to your fastball and therefore the rest of your arsenal will be a large priority this offseason and moving forward to 2026. In the first two months of the season, you averaged 89.3 MPH and saw a full tick up the rest of the season at 90.4 MPH after averaging 90.9 MPH in 2024. In 2026, your goal will be to average 91.5 MPH.

Foundational Goal: Command

Command Grade (SW / P2K)

Description: Sep. 26, 2025

We are going to repeat this goal for the same reasons we implemented it in the first place – highest Stuff grade pitch, 2nd highest usage pitch, lowest Command grade pitch. This offseason, working on this skill of throwing your sweeper in the zone should be a focus once you are spinning the ball in your progression. And then into the 2026, we can leverage the Range to track your progress outside of the game setting – making it a development priority.
